- [ ] year

- [ ] UK - Unknown

(M0190) List each Inpatient Diagnosis and ICD-9-CM code at the level of highest specificity for only those conditions treated during an inpatient stay within the last 14 days (no surgical, E-codes, or V-codes):

Inpatient Facility Diagnosis | ICD-9-CM

a. ____________________________ | __ __ __ __ __
b. ____________________________ | __ __ __ __ __

**Diagnoses, Severity Index, and Payment Diagnoses:** List each diagnosis for which the patient is receiving home care (Column 1) and enter its ICD-9-CM code at the level of highest specificity (no surgical/procedure codes) (Column 2). Rate each condition (Column 2) using the severity index. (Choose one value that represents the most severe rating appropriate for each diagnosis.) V codes (for M0230 or M0240) or E codes (for M0240 only) may be used. ICD-9-CM sequencing requirements must be followed if multiple coding is indicated for any diagnoses. If a V code is reported in place of a case mix diagnosis, then optional item M0246 Payment Diagnoses (Columns 3 and 4) may be completed. A case mix diagnosis is a diagnosis that determines the Medicare PPS case mix group.

**Code each row as follows:**

Column 1: Enter the description of the diagnosis.

Column 2: Enter the ICD-9-CM code for the diagnosis described in Column 1; Rate the severity of the condition listed in Column 1 using the following scale:

- 0 - Asymptomatic, no treatment needed at this time
- 1 - Symptoms well controlled with current therapy
- 2 - Symptoms controlled with difficulty, affecting daily functioning; patient needs ongoing monitoring
- 3 - Symptoms poorly controlled; patient needs frequent adjustment in treatment and dose monitoring
- 4 - Symptoms poorly controlled; history of re-hospitalizations

Column 3: (OPTIONAL) If a V code reported in any row in Column 2 is reported in place of a case mix diagnosis, list the appropriate case mix diagnosis (the description and the ICD-9-CM code) in the same row in Column 3. Otherwise, leave Column 3 blank in that row.

Column 4: (OPTIONAL) If a V code in Column 2 is reported in place of a case mix diagnosis that requires multiple diagnosis codes under ICD-9-CM coding guidelines, enter the diagnosis descriptions and the ICD-9-CM codes in the same row in Columns 3 and 4. For example, if the case mix diagnosis is a manifestation code, record the diagnosis description and ICD-9-CM code for the underlying condition in Column 3 of that row and the diagnosis description and ICD-9-CM code for the manifestation in Column 4 of that row. Otherwise, leave Column 4 blank in that row.
