## Overview

Effective, up-to-the-minute education targeted for field data collectors, their supervisors and those preparing for the COS-C Exam.

Experience the comprehensive and nationally acclaimed two-day Blueprint for OASIS Accuracy workshop and learn to confidently teach, audit and collect OASIS-C2 items accurately. Through guided, expert instruction, and participation in problem-solving discussions and application scenarios, achieve mastery of the OASIS items, conventions, and the latest data collection rules.

Rather than provide opinions, assumptions, or unfounded interpretations, the "Blueprint" presenters will model reliance on CMS guidance documents and provide and demonstrate strategies for how to find defensible answers to your OASIS questions.

### Program Objectives:

- Discuss the relationship of the Impact Act and the OASIS-C2 data set
- Identify structure and content changes in the OASIS-C2 data set effective January 1, 2017
- Provide the related CMS guidance for the OASIS-C2 data set
- Describe the use of a dash (-) as a response for select OASIS items
- Select accurate OASIS responses based on CMS guidance

## COS-C Exam

The Certificate for OASIS Specialist-Clinical (COS-C) Exam is a voluntary certificate examination for those interested in demonstrating and establishing their expertise and commitment to OASIS data accuracy. The scope of the COS-C exam is similar to the Blueprint workshop agenda, covering CMS guidelines related to OASIS time points, regulations, patient populations and OASIS-C2 item specific scoring. Candidates who successfully pass the examination are awarded the COS-C designation.
