## Overview

OASIS data collection continues to evolve! Based on the most current CMS guidance available, this workshop provides a comprehensive look at the OASIS items including the OASIS-D1 revisions and OASIS related PDGM information effective January 1, 2020. This effective, up-to-the-minute education is targeted for field data collectors, their supervisors, OASIS educators and reviewers, quality improvement staff, and those preparing for the COS-C Exam.

Experience the comprehensive and nationally acclaimed two-day Blueprint for OASIS Accuracy workshop and learn to confidently teach, audit and collect OASIS-D items accurately. Through guided, expert instruction, and participation in problem-solving discussions and application scenarios, achieve mastery of the OASIS items, conventions, and the latest data collection rules.

Rather than provide opinions, assumptions, or unfounded interpretations, the "Blueprint" presenters will model reliance on CMS guidance documents and provide and demonstrate strategies for how to find defensible answers to your OASIS questions.

## Learning Objectives

- Selecting OASIS responses that accurately represent clinical assessment findings
- Providing accurate data for quality measurement and payment
